

BRAEDEN CRAIG

FullStack Developer

PERSONAL PROFILE

I am a touring drummer turned developer based out of west-end Toronto. Challenging myself everyday by trying to master new tools and concepts in the development landscape. My current code passion is `three.js/webgl`.

SKILLS

- Solid knowledge-base of the React ecosystem, Next.js, Redux, GraphQL/Apollo, ES6 JavaScript, Node, Express, MongoDB and `three.js`.

WORK HISTORY

Fullstack Engineer

Urbancoolab, September 2020 to Present

- Architected and developed company brand site.
- Building functional and accessible UI for a core product offered by the company.
- Developed and facilitated in the development of REST API endpoints in collaboration with the Backend Engineers.
- Technologies used: Javascript, React, Redux, Next.js, Express, Node, Apollo, GraphQL, `three.js`, Contentful, Git, REST APIs, Cypress.

Developer

Critical Mass, April 2019 to September 2020

- Architected and developed accessible React components implemented in two internationally launched web applications for Nissan/Infiniti.
- Building UI for a global website using a decoupled CMS together with React and GraphQL.
- Technologies used: Javascript, React, Redux, Next.js, Express, Node, Apollo, GraphQL, GSAP, `three.js`, Contentful, Git, REST APIs, Firebase, Jest.

Professional Touring Musician

The World, March 2010 to Present

- Hired by numerous artists to record and / or to perform internationally.
- Managed international tour and event logistics including booking venues, accommodations, and travel.

ACADEMIC BACKGROUND

HackerYou Web Development Immersive

HackerYou College of Technology, January 2019 to March 2019

- Learned a myriad of programming languages, with a strong focus on HTML5, JavaScript, CSS3 and React.
- Fostered a supportive and encouraging classroom environment.
- Assisted students in HTML / CSS and JavaScript workshops post graduation.

Bachelor of the Arts Honors, Cultural Studies

Ryerson University, September 2012 - April 2016

- Maintained a consistently high GPA, while completing my degree from the back of a van or tour bus.

RECENT WORK / SIDE PROJECTS

Memory Pearl, Music for 7 Paintings

- Interactive art gallery, made with `three.js`. Walk up to different paintings and listen to different songs from the artist's album.

Bandcamp / Chit Chats App

- This is an application I have built that is currently being used by two Canadian record labels. It takes unshipped orders from Bandcamp, and creates/purchases/and prints shipping labels for these pending orders via Chit Chats.
